# **CABBAGE**

## **HOT WATER TREATED**

**Best Early, Second Early and Late Cabbage  
Listed Approximately in Order of Maturity**

### **Improved Extra Early Round (70 days)**

This new cabbage is very early, heads are solid, weight from 4 to 6 lbs. It is one of the earliest Round Cabbage, and will stand long after being ready to cut without splitting. Give it a trial for your first early crop.

**½ lb. \$2.00, 1 lb. \$4.00**

### **Copenhagen Late (80 days)**

A quality variety with round heads averaging about 8 lbs. in weight. They are very solid and have a small core. The plants are short-stemmed, the heads being produced almost on the surface of the ground, its sturdy growth is conspicuous. The heads show no tendency to burst open, but remain fresh and firm for a long time. If the harvest is delayed, the heads will increase in weight. A most productive variety, attractive, and always tightly folded. This strain is one of the most popular Copenhagen for early Kraut Cabbage.

**½ lb. \$2.00, 1 lb. \$4.00**

### **Glory, New Strain (75 days)**

This is what you have been looking for. A second early, sure-heading variety of large, solid heads. A compact grower allowing close planting. Especially desirable for market growers to set out in July after the early spring crops are harvested. This strain of Glory is a very heavy yielder, customers often reporting yields of 30 tons to the acre, and is one of the most popular cabbage used for Kraut making in N. Y. State.

**1 lb. \$4.00**

### **Early Kraut, Yellows Resistant (75 days)**

This variety is comparatively of recent introduction, but it already holds a foremost position in the class of Midseason Yellows Resistant varieties. Thus among growers of Cabbage for Kraut, it is regarded as the highly developed. In matter of yield, it approaches 30 tons per acre—in a normal season. It is Yellows resistant to the extent of 95 to 100 per cent. The head is typically ball-shaped and covered by only two overlapping green leaves. The interior is very tight and solid, making the heads average a weight of 6 pounds. The overlapping burst easily. The foliage is dark green. The stem is fairly short, thus about 4 inches in height.

**½ lb. \$2.25, 1 lb. \$4.50**

### **Marion Market (Yellows Resistant) (75 days)**

Is a strain of Copenhagen Market. Larger and coarser in plant, it has the round head and crisp tenderness of the parent cabbage. Will produce a normal crop on Yellows infected soil where non-resistant strains fail.

**½ lb. \$2.00, 1 lb. \$4.00**

## **Wisconsin All Seasons, Yellows Resistant** **(95 days)**

Very valuable as a substitute for the regular All Seasons in localities infested with the destructive disease known as "Cabbage Yellows." Chiefly used for Kraut; also valuable for winter keeping. Heads large; commonly 10-12 in. across, 8 in deep and weigh 9-10 lbs.

½ lb. \$2.00, 1 lb. \$4.00

## **Klitgord's Selected Danish Ballhead** **(100 days)**

This name stands for the strain of Danish Ballhead, Short Stem, originated in Northern New York State many years ago. It is a very select strain, developed with great care and understanding, and through continuous, careful selection of stock-plants, the original type has been kept true from year to year. The type is an ideal one and its characteristics are markedly uniform. The stem is short and the leaves are bluish-green. The head is large, perfectly ball-shaped, and covered with only two or three green surface leaves. The interior is exceptionally firm and solid. The maturity is about 100 days from date of transplanting. In seasons with normal rainfall, the heads average 6-7 pounds, and the total yield approximates 30 tons per acre. There exists no finer strain of Ballhead Cabbage for either Storage or Kraut.

½ lb. \$2.50, 1 lb. \$5.00

## **Wisconsin Hollander, Yellows Resistant** **(100 days)**

Of the Danish Ballhead Type, the plants are larger, foliage is very deep green. Heads are very uniform, keeps well and makes very good KRAUT. It will produce a large yield on Yellows infected soil.

½ lb. \$2.00, 1 lb. \$4.00

## **Penn State Ballhead (105 days)**

This cabbage has attractive, flattened, globe-shaped heads, large, firm and heavy. The stem is short and the leaves are a bright green color. It is excellent for winter storage and is highly recommended for its heavy yielding qualities

½ lb. \$2.25, 1 lb. \$4.50

## **Mammoth Red Rock (100 days)**

This is a large yielding strain, every plant producing a good head under favorable growing conditions. It is the best late maturing RED cabbage, a good keeper.

½ lb. \$2.50, 1 lb. \$4.50

## **BEETS**

### **Detroit Dark Red (Tall Top)**

This strain has a tall erect top. Roots are globe-shaped, symmetrical and with small collar and tap root. Interior color is deep blood red. Equally desirable for canning, the home and market garden.

1 lb. \$1.10

## **Detroit Dark Red (Short Top)**

A selection producing round, dark colored roots. Top small to medium height. Unexcelled as a market garden strain and very popular for canning where extra dark color and round beets in smaller sizes is wanted.

1 lb. \$1.10

## **CELERY**

### **Cornell 19**

Developed and introduced by New York State College at Ithaca and described as a cross between Golden Self Blanching and Utah. It is an early, easy blanching strain of outstanding fine quality. Commonly 10½ to 11 inches to joint with an over-all height of 24 inches. Hearts are long and full. Stems thick, rounded and of smooth texture. It combines the high quality of the Utah with the self-blanching characteristics of the Golden Self Blanching. It is early; vigorous in growth; resistant to Fusarium yellows.

¼ lb. \$4.25, ½ lb. \$8.00, 1 lb. \$16.00

### **Cornell 6**

Developed from the same cross as Cornell 19 and has somewhat similar characteristics. Cornell 6 is resistant to Fusarium yellow; is a week to 10 days earlier than 19 and has thicker, smoother, but somewhat shorter leaf stalks. It blanches with an attractive waxy sheen; it makes a heavier growth, has a fuller heart, but is made up of slightly fewer leaves than Cornell 19. Cornell 6 blanches in a shorter time than 19.

¼ lb. \$4.25, ½ lb. \$8.00, 1 lb. \$16.00

## **CARROT**

### **Nantes, Strong Top**

Desirable for home garden and early market. Roots bright orange 6-7 in. long, 1¼ in. thick and stump-rooted. Flesh bright orange, core inconspicuous. The Top is strong and unlikely to break at the collar in pulling

1 lb. \$2.40

### **Chantenay Red Cored**

Roots deep reddish-orange, 5½-6 in. long, 2¼ in. thick at the shoulder, tapered, stump-rooted, core reddish-orange, almost the same color as the flesh. Flesh fine-grained and tender, of sweet, delicate flavor.

1 lb. \$2.10

### **Long Chantenay Improved**

This type is bred for greater length for bunching purposes

1 lb. \$2.25

## **LETTUCE**

### **White Boston**

This is a cabbage, butter-head type. Leaves are smooth and straight on the edges. Plant and head entirely light green, heart buttery and yellow. An old and dependable strain.

½ lb. \$1.00, 1 lb. \$2.00

## **Imperial No. 44**

Has very long, well folded leaves and produces hard well formed heads under favorable conditions and is notably less susceptible to tip-burn.

½ lb. \$1.25, 1 lb. \$2.50

## **Imperial No. 456**

456 is a new strain of crisp-heading lettuce. It shows greater resistance to tip-burn and makes firm, hard heads. It is a Very Desirable Lettuce and is becoming very popular.

½ lb. \$2.50, 1 lb. \$5.00

## **Great Lakes**

A heading variety of the Imperial type. Leaves large and well-folded, ribs heavy. Shows considerable resistance to tip-burn and has the ability to head under adverse conditions.

½ lb. \$2.50, 1 lb. \$5.00

# **HEADQUARTERS OF STANDARD VARIETIES OF SELECTED ONION SEED**

Our seed is used by many large critical growers of Onions

## **Early Yellow Globe**

This is the earliest of all yellow Onions, true to name, globe shaped with bright beautiful yellow color. The skin is very thick and it is a fine keeper in storage. Our strain is superior to any other offered.

1 lb. \$4.00

## **Brigham Yellow Globe**

This new and very popular Onion is an improvement of the original strain offered. This is a great yielder with a heavy dark yellow skin, clear white flesh. It is the very best Onion for storage and can not be equalled.

1 lb. \$3.75

## **Southport White Globe**

The most popular white Onion. It has a fine globe shape, skin clear white, flavor is excellent, a good keeper.

1 lb. \$4.50

## **Sweet Spanish (Yellow Utah Strain)**

For your garden use this strain of large sweet onions, running about 4 inches in diameter. True globe shaped, very mild, flesh is firm, and the skin deep yellow.

1 lb. \$5.50

Beware of inferior seed offered at low prices, our stock is large and will cover your needs. WE HIGHLY RECOMMEND OUR STRAIN.

## **NOTICE!**

**We pay postage on all orders sent by Parcel  
Post. If sent C. O. D. charges will be  
added to the cost.**

## **ORDER EARLY**

J. H. Klitgord gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds sent out, and will not be in any way responsible for the crop.
